The Council of Clinical Health Psychology Training Programs (CCHPTP) is a training council that represents doctoral, internship, and post-doctoral training programs in Clinical Health Psychology. Initially established at the Arden House National Working Conference on Education and Training in Health Psychology in 1983, CCHPTP became recommissioned in 2007 with the Tempe Executive Summit on Education and Training in Clinical Health Psychology. CCHPTP has played an active role in defining the professional competencies and addressing training issues in clinical health psychology. Additionally, CCHPTP is an active participant in the Clinical Health Psychology Specialty Council (under the lead of Richard Seime, PhD), that defines our profession for the internal purpose of specialty recognition and for the external purpose of educating regulating bodies and the general public.
